

ViDiLOOK

DEVELOPMENT PLAN

ViDiLOOK is a **web3** short video platform that seamlessly connects advertisers and traffic individuals, allowing users who watch videos directly to share advertising fees, making advertisers more accurate and value for money, so that users are no longer just contributors to traffic, but even more, they become direct beneficiaries of advertisements.

ViDiLOOK works on video ads to create global traffic, and then connects with wider fields, such as DEFI mining, NFT, Gamefi, Metaverse, AI, etc.

VDL is the platform token of ViDiLOOK, It has vast application scenarios and huge appreciation space.
